

# TECHNICAL INFORMATION

## WHEEL GRINDING MACHINE

Model: **600RB60**

### Measures of grinding wheel

Height: 1.373mm  
Width: 1.225mm  
Length: 1.168mm

### Motor

WEG High Performance  
Power: 15 HP

### Voltage / Electrical

200v | 380v or 440v  
24v Command

### Grinding wheel

Ø24" (609mm)  
Width: 50 or 60mm  
Hole: 8" (203.2mm)  
Cutting speed: 63 mts / sec.  
(speed variation with 3 stages)

Initial diameter to 500 | 1900 RPM  
From 500 to 400 | 2300 RPM  
From 400 to final | 2850 RPM

### Approximate weight

600 Kg

Manufactured in accordance with the  
**Brazilian Association of Machinery and Equipment**

### Packing

The machine is fixed on the pallet and wrapped in bubble wrap and closed with treated wood.

### Loading

The equipment can be transported by forklift or pallet jack truck.

Equipment for deburring castings parts of different sizes and materials.

### Safety

- Automatic closing of the grinding wheel in case of breakage.
- Auto shut-off and / or non-operation if any door is open.
- Signal tower that indicates when the equipment is on (green) and or in emergency mode (blinking red).
- Mushroom emergency button (spins loose).
- General wrench with lock.
- Network light.
- Power button turns green and turns off / red.
- Reset button.
- Open door light sign.
